Section 1 – Identification of the Substance/Preparation and of the Company/Undertaking

MSDS Approval Date: 10/12/2000 Material / Item Name: Cleanser

MSDS Prepared by: BSQ Chemical Name: N/A

Manufacturer/Distributor: Litrox Factory Investments LLC (443960-91) Family: Cleansing Agent

> US 8130 SW Portland, Oregon, Beaverton-Hillsdale Highway 97225.

Product Use: Wiping Solution Product #: 1001763-64-65

Section 2 - Composition/Information on Ingredients

Chemical Identity	CAS Numbers	EINECS#	INCI 0Name	Exposure OSHA	Limits ACGIH	Carcinogen	%
·				TWA/STEL	TWA/STEL	IARC/NTP/OSHA	
Isopropyl Alcohol	67-63-0	200-661-7	Isopropyl Alcohol	<u>400 ppm</u>	<u>400 ppm</u>	Not Listed	75-80
Ethyl Acetate	141 - 78 - 6	205-500-4	Ethyl Acetate	400 ppm	400 ppm	Not Listed	20-25

N/E - None Established N/DA - No Data Available N/A -

N/R - Not Reviewed Not Applicable

> Hazard Symbols: Xi, F **Risk Phrases:** R11, R36/37/38, R66, R67 **Safety Phrases:** S7/9, S16, S26,

S33, S37/39, S45

Section 3 - Hazards Identification

EMERGENCY OVERVIEW

This information is based on findings from related or similar materials.

- Flammable liquid and vapor!
- May cause eye irritation.
- May cause skin irritation.
- Avoid prolonged or repeated breathing of gases, vapors or mists.
- Please read entire MSDS for additional information.

Potential Health Effects, Signs and Symptoms of Exposure:

Primary Route of Entry Inhalation, skin and ingestion.

Eye Vapors are irritating to the eyes. Splashes may cause severe irritation, with stinging, tearing, redness,

and pain with possible corneal damage.

Skin Repeated/prolonged contact may cause drying of skin. Symptoms include redness, burning, drying, cracking and skin burns. Ingestion Swallowing small amounts during normal handling is not likely to cause harmful effects; swallowing large amounts may be harmful. This material can get into the lungs during swallowing or vomiting.

Inhalation Vapors are irritating to nasal passages and throat and may cause stupar or headache. Symptoms usually occur at air concentrations higher than the recommended exposure limits.

Sub-Chronic Effects Significant exposure to this chemical may adversely affect people with chronic disease or may cause damage to the respiratory system, skin and eyes.

NOTE: Refer to Section 11, Toxicological Information for Details

Section 4 - First Aid Measures

Flush with water for 15 minutes, including under eyelids. Get medical help if discomfort persists. First Aid for Eye

Wash thoroughly with soap and water. Remove contaminated clothing. Get medical help if discomfort First Aid for Skin

If individual is drowsy or unconscious, do not give anything by mouth; place individual on the leftside First Aid for Ingestion

with head down. Seek medical attention for advice about whether to induce vomiting. If possible, do

not leave individual unattended.

Remove to fresh air. If having breathing difficulty, give oxygen. If breathing has stopped, give

artificial respiration. Seek medical attention if discomfort persists. First Aid for Inhalation

MSDS#: KIP101200-B1S

Section 5 - Fire Fighting Measures

Flash Point (°F/°C)

68°F/20°C

Flammable Limit (vol%)

LEL: 2 %; UEL: 11.4 %

Auto-ignition Temperature (vol%)

N/DA

Method:

Extinguishing Media: Use CO2, dry chemcial for small fires, or alcohol type aqueous film forming foam. Fire Fighting

If potential for exposure to vapors or products of combustion, wear complete personal

Instructions: protective equipment including self contained breathing apparatus, with full face operated in

pressure demand. Fight fire from a safe distance/protected location.

Unusual Hazards: Flammable. When exposed to heat and flame, material is a fire explosion hazard. Vapor is heavier

than air and can travel considerable distance to source of ignition and flash back. Material creates a

special hazard if it floats on water.

Section 6 - Accidental Release Measures

Spill or Release Procedures Eliminate all sources of heat and ignition. Use absorbent material for spills and dike it, wash spill material into retaining containers. Place containers in a well ventilated area. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. Keep unnecessary and unprotected personnel from entering. Contain and recover liquid when possible. Use non-sparking tools and equipment. Collect liquid in an appropriate container or absorb with an inert material (e. g., vermiculite, dry sand, earth), and place in a chemical waste container. Do not use combustible materials, such as sawdust. Do not flush to sewer! US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities. The toll free number for the US Coast Guard National Response Center is (800) 424-8802. EU Regulations require the consultation of Directive 98/24/EC. If a leak or spill has not ignited, use water spray to disperse the vapors, to protect personnel attempting to stop leak, and to flush spills away from exposures.

Section 7 - Handling and Storage

Handling Closed containers exposed to temperature above (120 ° F) in transit or storage may develop vapor pressure.

Open containers slowly. Ground all metal containers when transferring material. Wash face and hands thoroughly

with soap and water after handling and before eating, drinking or smoking.

Storage Store in a cool, well ventilated area away from heat, sparks and flame. Keep containers closed when not in use.

DO NOT STORE IN METAL CONTAINERS. Failure to comply with proper storage instructions will result in the

material being non-refundable.

Explosion Hazard Flammable liquid. Never use welding or cutting torch on or near drum (even empty) because product (even just

residue) can ignite explosively.

Section 8 - Exposure Controls / Personal Protective Equipment

Engineering Controls

Facilities storing or ultilizing this material should be equipped with an eye facility and safety shower. Use process enclosures local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Use explosion-proof ventilation equipment.

Personal Protective Equipment

General To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a

hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132), or European Standard EN166 be conducted before using this product . Provide eye wash stations and safety showers. Wear impervious clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole

body suit. Nitrile rubber is better than PVC.

Eye/Face Chemical splash goggles in compliance with OSHA regulations are advised; however, OSHA regulations also

Protection permit other type of safety glasses.

Skin Protection Use impermeable clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole

body suit. Neoprene and Nitrile rubber is better than PVC..

Respiratory A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be

Protection permissible under certain limited circumstances where airborne concentrations are expected to exceed

exsposure limits. Protection provided by air purifying respirators is limited. Wear a NIOSH/MSHA or European Standard EN 149 approved full-facepeice airline respirator in the positive pressure mode with emergency escape provisions. Follow OSHA repsirator regulations found in 29 CFR 1910.134 or European

Standard EN 149.

Chemical Fate Information

Chemical I are implimation	
Biodegradability	When released into the soil, this material is expected to quickly evaporate. When released into the soil, this
	material may leach into groundwater. When released into the soil, this material may biodegrade to a moderate
	extent. When released to water, this material is expected to quickly evaporate. When released into the water,
	this material is expected to have a half-life between 1 and 10 days. When released into water, this material may
	biodegrade to a moderate extent. This material is not expected to significantly bioaccumulate.
Chemical Oxygen Demand	N/ DA

Section 13 - Disposable Considerations

Dispose of diking materials and absorbent in compliance with State, Local, and Federal regulations. Residual vapors may explode on ignition; do not cut, drill, or weld on or near the container. Mix with compatible chemical which is less flammable and incinerate.

Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements. For EU Member States, please refer to any relevant Community provisions relating to waste. In their absence, it is useful to remind the user that national or regional provisions may be in force.

Section 15 - Regulatory Information

US Federal Regulations

US Federal Regulations	
Clean Air Act: HAP/ODS	This product contains the following HAP's or ODS:
	<u>NONE</u>
Clean Water Act: Priority Pollutant	The following ingredients are listed as hazardous pollutants under the CWA:
	• NONE
	None of the ingredients are listed as primary pollutants nor are they listed as toxic
	pollutants.
FDA: Food Packaging Status	This product has not been cleared by the FDA for use in food packaging and / or other
	applications as an indirect food-packaging additive.
Occupational Safety and Health	This product is considered to be hazardous under the OSHA Hazard Communication
Act	Standard. It's hazards are:
	Immediate (acute) health hazard
DCD A	• Fire hazard
RCRA	This product contains the following chemicals considered to be hazardous waste under
	RCRA (40 CFR 261).
	• Ethyl Acetate CAS# 141-78-6, RCRA Code: U112
SARA Title III: Section 302 (RQ)	• <u>Characteristic of Ignitability, RCRA Code: D001</u>
SARA THE III. Section 302 (RQ)	This product contains no chemicals regulated under Section 302 as extremely hazardous
SARA Title III: Section 302 (TPQ)	substances.
, ,	This product contains chemicals regulated under Section 304 as extremely hazardous
	chemicals for emergency release notification ("CERCLA" List):
GADATIA III G	• Ethyl Acetate CAS# 141-78-6, RQ (Lbs) 5000
SARA Title III: Section 311-312:	This product is considered to be hazardous under the OSHA Hazard Communication
	Standard and is regulated under Section 311-312 (40 CFR 370). It's hazards are:
	Immediate (acute) health hazard
SARA Title III: Section 313:	Fire hazard
SAKA Tide III. Section 313.	This product contains the following chemicals which are subject to the reporting
	requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization
	Act of 1986 and 40 CFR Part 372:
TSCA Section 8(b): Inventory:	Isopropyl Alcohol CAS# 67-63-0
15CA Section 6(b). Hivelitory.	This product contains chemicals listed on the TSCA inventory or otherwise complies with
TSCA Significant New Use Rule:	TSCA premanufacture notification requirements.
15C/1 Significant New Osc Rule.	None of the chemicals in this material have a SNUR under TSCA.
