4. FIRST AID MEASURES

General:

The injured person is removed from the endangered environment. The contaminated, soaked clothing should be removed immediately. Unconscious, injured or spastic condition. Never give anything by mouth.

Inhalation:

Remove to fresh air. If symptoms develop and persist, get medical attention.

Skin contact:

Immediately flush skin with plenty of water (using soap, if available). Remove contaminated clothing and shoes. Wash clothing before reuse. Get immediate medical attention if symptoms occur.

Eye contact:

Immediately flush eyes with plenty of water for at least 15 minutes. Get immediate medical attention.

Ingestion:

Do not induce vomiting. Keep individual calm. Get medical attention immediately.

5. FIREFIGHTING MEASURES

5.1 Extinguishing media:

Use carbon dioxide or dry chemical for small fires; aqueous foam or water for large fires.

5.2 Special hazards arising from the substance or mixture:

During fire toxic vapours are generated. High temperatures and fire conditions may cause rapid and uncontrolled polymerization which can result in explosions and the violent rupture of storage vessels or containers. Avoid the use of a stream of water to control fires since frothing can occur.

5.3. Advice for fire fighters:

Use gas-proof protection clothing and self-contained breathing apparatus. Full protective equipment, including self contained breathing apparatus is recommended.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions:

Use personal protection measures. Avoid inhalation of vapors/mist/gas. Ensure appropriate ventilation. Remove all sources of ignition. Evacuate personnel to a safe area. Use appropriate personal protective equipment. The skin, eyes and clothing, the drug inhalation, and ingestion should be avoided. See protective measures 7 and 8 points as well.

6.2. Environmental precautions:

Avoid contact with soil, watercourses, drains and sewage systems. If the product has caused environmental pollution (sewage systems, watercourses, soil or air) inform the relevant authorities. In case of leakage of the product to the environment in large quantities all persons not involved in the rescue operation must be evacuated from the hazard area and relevant services must be notified. Shut off all ignition sources. Leakage must be quickly located and removed. When removing, do not inhale vapours and aerosols.

MATERIAL SAFETY DATA SHEET

REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

Publishing date: 18. 06. 2015.

Revision date: -

6.3. Methods and material for containment and cleaning up:

Leakage should be collected with sorbents such as dry peat, sawdust and placed in sealed containers using non-sparking tools. The collected material should be returned for disposal in accordance with applicable chemical regulations. Avoid contact with oxidizing substances.

Use personal protective equipment in accordance with point 8.

7. HANDLING AND STORAGE

7.1 Handling:

Avoid contact with skin and eyes. Avoid breathing vapours or mist. Keep away from sources of ignition. Keep container closed when not in use. Avoid prolonged exposure to light. Remove all contaminated clothing, shoes, belts and other leather goods immediately. Incinerate leather goods (including shoes). Wash contaminated clothing thoroughly before reuse. Wash skin thoroughly with soap and water after handling. Solvents should not be used to clean skin because of increased penetration potential.

Most acrylic monomers have low viscosities, thus only needing room temperature conditions to facilitate proper pouring techniques. However, viscous type gels such as these may require heating to facilitate proper pouring techniques. To ensure that this happens, product may be heated to 60°C/140°F for not more than 24 hours. Do NOT use localized heat sources such as band heaters to heat/melt product. Do NOT use steam. Hot boxes or hot rooms are recommended for heating/melting material. The hot box and/or room should only be set to a maximum temperature of 60°C/140°F. Do not overheat, this may compromise product effectiveness and should be avoided. Refrain from multiple reheatings of product, this will also diminishing the quality of the product.

7.2. Storage:

Storage: store in tightly closed containers in a dry and well-ventilated place. Protect from light, heat and ignition sources.

Store in a cool place. Opened containers must be carefully resealed and stored upright to prevent leakage. Product is extremely light sensitive. If exposed to natural light or UV light, material will cure very quickly. Store in a cool, dry place, away from heat and all types of light.

7.3. Specific end use(s): Spontaneous polymerization can occur. Use eye and skin protection.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. Engineering controls: Good general ventilation should be sufficient to control airborne levels in small quantity use. Local exhaust is recommended for bulk repackaging or continuous large quantity use.

8.2. Occupational exposure controls:

The proper care is needed when working in preparation for clothing, eye, or. avoid skin contact. Normal conditions of use and use with adequate ventilation. During breaks and after work wash your hands.

8.3. Personal protective equipment (PPE):

Respiratory protection: usually not necessary. However, inhalation of dusts and fumes should be avoided.

Hand protection: appropriate chemically resistant gloves (EN 374) is prolonged, direct contact, which corresponds to > 480 minutes of penetration of, for example, nitrile rubber (0.4 mm), CR (0.5 mm). Wash when contaminated. If the punctured gloves inside, stained, respectively, the dirt can be removed, the glove should be treated as hazardous waste.

Eye protection: safety glasses with side shields (EN 166).

Skin Protection: wear appropriate protective clothing (EN 463).
