REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

Publishing date: 01. 07. 2015

Revision date: -

### 4. FIRST AID MEASURES

#### General:

The injured person is removed from the endangered environment. The contaminated, soaked clothing should be removed immediately. Unconscious, injured or spastic condition. Never give anything by mouth.

#### Inhalation:

Remove the affected person to fresh air and keep at rest in. Medical care in case of complaint to be considered.

#### Skin contact:

Contaminated clothing should be removed. Rinse with water, then soap and water to the skin. In case of complaint, seek medical advice.

#### Eye contact:

Eye contact, immediately rinse with plenty of water for at least 15 minutes while pulling the eyelids apart with your fingers. In case of complaint, seek medical advice.

#### Ingestion:

One or two glasses of water to drink. Do NOT induce vomiting! Medical care must be used!

### 5. FIREFIGHTING MEASURES

**5.1. Extinguishing media:** use carbon dioxide or dry chemical for small fires; aqueous foam or water for large fires.

**5.2. Special hazards arising from the substance or mixture:** High temperatures and fire conditions may cause rapid and uncontrolled polymerization which can result in explosions and the violent rupture of storage vessels or containers. Avoid the use of a stream of water to control fires since frothing can occur.

**5.3. Advice for fire fighters:** full protective equipment, including self contained breathing apparatus is recommended.

### 6. ACCIDENTAL RELEASE MEASURES

**6.1. Personal precautions:** Unauthorized persons must be removed from the site. The skin, eyes and clothing, the drug inhalation, and ingestion should be avoided. See protective measures 7 and 8 points as well.

**6.2. Environmental precautions:** Spillage should be ensured that the product is not exposed to sewage, rivers, watercourses, groundwater and soil. Larger spill, the responsible authorities must be informed.

**6.3. Methods and material for containment and cleaning up:** Sweep up to avoid slipping hazard. Keep airborne particulates at a minimum when cleaning up spills.

### 7. HANDLING AND STORAGE

**7.1. Handling:** Avoid contact with skin and eyes. Avoid breathing vapor. Keep container closed when not in use. Avoid prolonged exposure to light. Remove all contaminated clothing, shoes, belts and other leather goods immediately. Incinerate leather goods (including shoes). Wash contaminated clothing thoroughly before reuse. Wash skin thoroughly with soap and water after handling. Solvents should not be used to clean skin because of increased penetration potential.

## MATERIAL SAFETY DATA SHEET

REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

Publishing date: 01. 07. 2015

Revision date: -

Most acrylic monomers have low viscosities, thus only needing room temperature conditions to facilitate proper pouring techniques. However, viscous type gels such as these may require heating to facilitate proper pouring techniques. To ensure that this happens, product may be heated to 60°C/140°F for not more than 24 hours. Do NOT use localized heat sources such as band heaters to heat/melt product. Do NOT use steam. Hot boxes or hot rooms are recommended for heating/melting material. The hot box and/or room should only be set to a maximum temperature of 60°C/140°F. Do not overheat, this may compromise product effectiveness and should be avoided. Refrain from multiple reheating of product, this will also diminishing the quality of the product.

**7.2. Storage:** Product is extremely light sensitive. If exposed to natural light or UV light, material will cure very quickly. Store in a cool, dry place, away from heat and all types of light. Store at temperatures below 86°F/30°C but above the product's freezing point. If no freezing point is given, keep above 32°F/0°C at all times.

**7.3. Specific end use(s):** Spontaneous polymerization can occur. Although material is non-flammable please try to eliminate all ignition sources. Use eye and skin protection. Place leaking containers in a well ventilated area. Dike and recover large spills. Soak up small spills with inert solids (such as vermiculite, clay) and sweep/shovel into disposal container. Wash spill area with strong detergent and water solution; rinse with water, but minimize water use during clean-up. Do not flush to sewer!

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Engineering controls:** Good general ventilation should be sufficient to control airborne levels in small quantity use. Local exhaust is recommended for bulk repackaging or continuous large quantity use.

#### Occupational exposure controls:

The proper care is needed when working in preparation for clothing, eye, or avoid skin contact. Normal conditions of use and use with adequate ventilation. During breaks and after work wash your hands.

#### Personal protective equipment (PPE):

**Respiratory protection:** usually not necessary. However, inhalation of dusts and fumes should be avoided.

**Hand protection:** appropriate chemically resistant gloves (EN 374) is prolonged, direct contact, which corresponds to > 480 minutes of penetration of, for example nitrile rubber (0.4 mm), CR (0.5 mm). Wash when contaminated. If the punctured gloves inside, stained, respectively. The dirt can be removed, the glove should be treated as hazardous waste.

**Eye protection:** safety glasses with side shields (EN 166).

**Skin Protection:** wear appropriate protective clothing (EN 463).
