Section 3 - Hazards Identification

EMERGENCY OVERVIEW

This information is based on findings from related or similar materials.

May cause eve irritation.

- Flammable liquid and vapor
- May cause skin irritation.
- Avoid prolonged or repeated breathing of gases, vapors or mists.

Potential Health Effects, Signs and Symptoms of Exposure:

Primary Route of Entry Inhalation, skin contact, eye contact

Eye Exposure causes eye irritation. Symptoms include stinging, tearing, redness and swelling. Can cause skin irritation. Prolonged or repeated contact may dry the skin. Symptoms may include Skin

redness, burning, drying, cracking, and skin burns.

Swallowing small amounts during normal handling is not likely to cause harmful effects; swallowing Ingestion

large amounts may be harmful. This material can get into the lungs during swallowing or vomiting.

Vapor and mist are irritating to mucous membranes. Breathing small amounts during normal handling Inhalation

is not likely to cause harmful effects. Breathing large amounts may be harmful. Symptoms usually

occur at air concentrations higher than the recommended exposure limits.

May cause headaches, nausea, vomiting and narcotic effect if over-exposed. **Sub-Chronic Effects**

NOTE: Refer to Section 11, Toxicological Information for Details

Section 4 - First Aid Measures

First Aid for Eye If symptoms develop, move individual away from exposure and into fresh air. Flush eyes gently for 15 minutes

with water while holding eyelids apart. If symptoms persist or there is any visual difficulty, seek medical

attention.

First Aid for Skin Remove contaminated clothing. Wash exposed area with soap and water. If symptoms persist, seek medical

attention.

First Aid for Inhalation

Remove to fresh air. If breathing is difficult, administer oxygen. If symptoms persist, seek medical attention. First Aid for Ingestion If individual is drowsy or unconscious, do not give anything by mouth; place individual on the leftside with the

head down. Seek medical attention for advice about whether to induce vomiting. If possible, do not leave

individual unattended.

MSDS#: KTC112900-KYS

Section 5 - Fire Fighting Measures

Flash Point(°F/°C) Flammable Limit(vol%) Auto-ignition Temperature(vol%) Tag Closed Cup: 68°F/20°C 750 ° F - 900 ° F 400 ppm

Method:

Extinguishing Media: Foam, dry chemical, cold water spray.

Fire Fighting Wear self-contained breathing apparatus and protective clothing. USE WATER WITH CAUTION. Use

Instructions: water spray to keep fire-exposed containers cool. Water may be ineffective in fighting the fire. Fight

fire from a safe distance and protected location.

Flammable. When exposed to heat and flame, material is a fire explosion hazard. It may produce toxic Unusual Hazards:

> products CO, Carbon dioxide and oxides of nitrogen. Vapors may cause a flash fire or ignite explosively. Vapors may travel considerable distance to a source of ignition and flash back. Prevent

buildup of vapors or gases to explosive concentrations.

Section 6 - Accidental Release Measures

Spill or Release Procedures

Eliminate all sources of heat and ignition. Use absorbent material for spills and dike it, wash spill material into retaining containers. Place containers in a well ventilated area. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. Keep unnecessary and unprotected personnel from entering. Contain and recover liquid when possible. Use non-sparking tools and equipment. Collect liquid in an appropriate container or absorb with an inert material (e.g., vermiculite, dry sand, earth), and place in a chemical waste container. Do not use combustible materials, such as sawdust. Do not flush to sewer! US Regulations (CERCLA) require reporting spills and releases to soil, water and air in excess of reportable quantities. The toll free number for the US Coast Guard National Response Center is (800) 424-8802. If a leak or spill has not ignited, use water spray to disperse the vapors, to protect personnel attempting to stop leak, and to flush spills away from exposures.

Section 7 - Handling and Storage

Keep containers cool and dry. Keep away from heat, light and ignition sources. Avoid breathing high vapor Handling

concentrations. Avoid prolonged or repeated contact with skin. Use only with adequate ventilation. Wash

thoroughly after handling.

Store in a well ventilated area. Store @ 70° + 15° F, allow some air space above liquid level. Keep Storage

containers closed while not in use.

Explosion Hazard Vapors are heavier than air and may travel along the ground or may be moved by ventilation and ignited by

> pilot lights, other flames, sparks, heaters, smoking or other ignition sources at locations distant from material handling point. Never use welding or cutting torch on or near drum (even empty) because product (even

just residue) can ignite explosively.

Section 8 - Exposure Controls / Personal Protective Equipment

Engineering

To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a Controls hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132), or European

Standard EN166 be conducted before using this product . Provide eye wash stations and safety showers. Wear impervious clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole body suit.

Nitrile rubber is better than PVC.

Personal Protective Equipment

General For open systems where contact is likely, wear long sleeves, chemical resistant gloves and chemical

goggles. Provide eye wash stations and showers.

Eye/ Face Chemical splash goggles in compliance with OSHA regulations are advised; however, OSHA regulations also

Protection permit other type of safety glasses.

Skin Protection Wear resistant gloves. To prevent repeated or prolonged skin contact, wear impervious clothing and boots.

Respiratory Protection

A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain limited circumstances where airborne concentrations are expected to exceed exsposure limits.

Protection provided by air purifying respirators is limited. Wear a NIOSH/MSHA or European Standard EN 149 approved full-facepeice airline respirator in the positive pressure mode with emergency escape provisions.

Follow OSHA repsirator regulations found in 29 CFR 1910.134 or Eurpean Standard EN 149.

Chemical Fate Information

Biodegradability	N/DA	
Chemical Oxygen Demand	N/DA	

To the best of our knowledge, the ecotoxocological and chemical fate properties have not been thoroughly investigated.

Do not allow to enter drinking water supplies, wastewater, or soil.

Section 13 - Disposable Considerations

Dispose of diking materials and absorbent in compliance with State, Local, and Federal regulations. Residual vapors may explode on ignition; do not cut, drill, or weld on or near the container. Mix with compatible chemical which is less flammable and incinerate. Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations. Dispose of container and unused contents in accordance with federal, state and local requirements. For EU Member States, please refer to any relevant Community provisions relating to waste. In their absence, it is useful to remind the user that national or regional provisions may be in force.

Section 15 - Regulatory Information

US Federal Regulations

Clean Air Act: HAP/ODS	This product contains the following HAP's or ODS: • Methyl Ethyl Ketone CAS #78-93-3 (HAP) • Benzophenone CAS #119-61-9 (HAP) This product contains no ODS's.
Clean Water Act: Priority Pollutant	The following ingredients are listed as hazardous pollutants under the CWA: Isobutyl Acetate CAS #110-19-0 Isopropyl alcohol CAS #67-63-0 None of the ingredients are listed as primary pollutants nor are they listed as toxic pollutants.
FDA: Food Packaging Status	This product has not been cleared by the FDA for use in food packaging and / or other applications as an indirect food additive.
Occupational Safety and Health Act	This product is considered to be hazardous under the OSHA Hazard Communication Standard. Its hazards are: Immediate (acute) health hazard Fire hazard
RCRA	This product contains chemicals considered to be hazardous waste under RCRA (40 CFR 261): Ethyl Acetate CAS #141 - 78 - 6 RCRA Code: U112, Methyl Ethyl Ketone CAS #78 - 93 - 3 RCRA Code: U159.
SARA Title III: Section 302 (TPQ)	This product contains no chemicals regulated under Sec. 302 as extremely hazardous substances.
SARA Title III: Section 302 (RQ)	This product contains the following chemicals regulated under Section 304 as extremely hazardous chemicals for emergency release notification ("CERCLA" List): • Ethyl Acetate CAS #141-78-6 RQ (Lbs) 5000 • Isobutyl Acetate CAS# 110-19-0 RQ (Lbs) 5000 • Methyl Ethyl Ketone CAS #78-93-3 RQ (Lbs) 5000
SARA Title III: Section 311-312:	This product is considered to be hazardous under the OSHA Hazard Communication Standard and is regulated under Section 311-312 (40 CFR 370). Its hazards are: • Immediate (acute) health hazard • Fire hazard
SARA Title III: Section 313:	This product contains the following chemical subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR Part 372: Methyl Ethyl Ketone, CAS #78 - 93 - 3 Isopropyl alcohol CAS #67-63-0.
TSCA Section 8(b): Inventory:	This product contains chemicals listed on the TSCA inventory or otherwise complies with TSCA premanufacture notification requirements.
TSCA Significant New Use Rule:	None of the chemicals in this material have a SNUR under TSCA.

Crystal Nails UV Top Coat:

HAZARD SYMBOLS: **Xn, F:** Harmful, Highly Flammable
RISK PHRASES: **R11,** highly flammable, **R20:** Harmful by inhalation, **R36/37/38:** Irritating to eyes, respiratory system and skin
SAFETY PHRASES: **S7/9:** keep container tightly closed and in a well
ventilated place, **S16:** keep away from sources of ignition- no smoking, **S24/25:** In case of contact with eyes, rinse immediately with plenty of water
and seek medical advise, **S33:** take precautionary measures against static
discharges, **S37/39:** wear suitable protective clothing & gloves, **S45:** In
case of accident or if you feel unwell, seek medical advise immediately
(show the label where possible), **S61:** Avoid release to the environment.
Refer to special instruction/Safety data sheets
